

# MULTICONTROLLER II

The **Multicontroller II** can control up to six pan/tilt heads from the Autocam range, storing up to 100 head and lens positions for each camera at any one time, a total of 600 in all pre shot sets.

This economical and compact controller recalls shots and repositions to a selected camera location in a smooth and co-ordinated movement with all axes arriving at the same time. Speed of transition between shots is determined by the operator by setting the speed knob.

A three-function proportional rate joystick gives smooth manual positioning of the head. Pan and tilt rates are contoured with the level of joystick movement determining the speed of camera motion. Rotation of the joystick controls the zoom, while a separate rotary knob controls the focus.

The Multicontroller II can easily be adjusted to accommodate user preference as well as uses in different applications.

## Key Features

- ➔ Affordable, reliable and flexible, the perfect controller for many multi camera applications
- ➔ Straightforward operation allows instinctive control within minutes of first using it
- ➔ High end operational performance at a very affordable price

## MULTICONTROLLER II

### Technical Specification

Number of cameras controlled	6
Shot Storage	Per camera – 100 / Total – 600
Baud Rates	2400, 9600, 19200
Flush Mounting:	
Height	226mm / 8.9"
Width	295mm / 11.6"
Depth	98mm / 3.9"
Desktop Shell:	
Height	230mm / 9.1"
Width	299mm / 11.8"
Depth	81mm to 134mm / 3.2" to 5.3"
Panel Weight	2.8kg / 6.2 lbs
(With Desktop Case)	5.5kg / 12.1 lbs
Power Supply Requirement	100-240V / AC 50/60 / Hz/150 Watt

Specifications and features subject to change without notice
